

JASOOR VENTURES • DEAL SOURCING PROTOTYPE

Prioritising the deal pipeline, with grounded evidence.

A working prototype that ranks every MENA company against analyst-defined criteria — so the best deals surface first, with source-linked evidence behind every score.

Ranked pipeline

Must-have checks

Grounded evidence

Auditable scoring

MENA-focused

Analyst expertise is the scarce resource

Today, judgement gets diluted by triage. The prototype takes the breadth work — so expertise compounds where it matters.

BEFORE — EXPERTISE DILUTED BY TRIAGE

Reading every deck, ranking by gut

- Hours lost on basic fact-finding the analyst could automate
- Mental scoring is inconsistent across the team and hard to defend in IC
- Good companies sit untouched while competitors reach the founder first
- No memory of why a company was deprioritised three months ago

WITH THE PROTOTYPE — EXPERTISE AMPLIFIED

Analyst sets the rules. Machine does the legwork.

- Analysts define what matters — criteria, must-haves, weights — and the queue follows
- Personal view lets each analyst overlay their own conviction on top of the House view
- Machine handles breadth (read, extract, rank); analysts do depth (judgement, founders, IC)
- Every override is captured with a reason — analyst expertise becomes institutional memory

The shift

Analyst expertise stays the ground truth — *the machine just makes it scale, stay consistent, and leave a trail.*

Every company, scored and ranked — best deal first

One ordered queue. Click any company → full grounded scorecard + provenance.

Why this rank — grounded score

Visible formula · raw inputs · per-component evidence

Grounded formula and inputs									
Formula used: <code>FinalScore = (WeightedScore * FormulaScore) / (1 + (EvidenceScore / FormulaScore))</code>									
Component	Value	Score	Weight	Source	Confidence	Evidence	Score	Weight	Source
Gross Margin Score	71%	1.00	0.30	---	---	Gross Margin (2025) 71%	1.00	---	---
Funding Stage	Series A	1.00	0.30	---	---	24 months funding required. SERIES A April 2026 (cid:127) Raising	1.00	---	---
Annual Recurring Revenue	\$4.2M	1.00	0.30	---	---	TRACTION From 0 to \$4.2M ARR in 19 months. \$4.2M @ 138% \$380K	1.00	---	---
Employee Count	28	1.00	0.30	---	---	employee count 2025 28	1.00	---	---
Customer Count	62	1.00	0.30	---	---	Customer Count 2025 62	1.00	---	---

Trust the rank — full provenance

Every claim → source document, evidence text, extractor, run

as_of_date	scenario	period_label	evidence_text	evidence_url	extractor_name	extractor_ver	origin_path

Best deals first. Defensible ranking. Auditable end-to-end.

Each ranked company is built from grounded observations

Example: NovaPay's traction slide → extracted metrics → score components → its place in the queue.

Extracted — structured observations

Metric	Value	As of	Scenario	Conf.
arr	\$4.2M	2026-04	actual	0.86
customer_count	62	2026-04	actual	0.86
revenue	\$1.8M	2025-12	actual	0.86
arr	\$22.0M	2027-12	projection	0.86
gross_margin	71%	2025-12	actual	0.86
burn_rate	(\$4.2M)	2025-12	actual	0.86

12 slides preprocessed • 49 observations extracted • method: layout_pattern (deterministic)

Gap-aware: missing must-haves (mrr, founding_year) automatically queue follow-up actions.

Every score in the ranked queue has a visible formula

Example — NovaPay's Financials score of 3.16 / 5, built from 4 extracted components.

Formula (house weights):

```
FinancialsScore = weighted_avg( gross_margin/20, runway_months/6, 1 + 2·(revenue/burn_rate), funding_stage ) → clamped 1–5
```

Component	Raw value	Derived	Weight	Evidence (grounded to deck)
gross_margin_score	71	3.55	0.35	gross_margin 2025 71%
runway_score	24 months	4.00	0.25	24-month runway
burn_efficiency_score	\$1.8M / \$4.2M	1.86	0.25	revenue 2025 1.8 ; burn_rate 2025 (4.2)
funding_stage_score	Series A	3.00	0.15	SERIES A April 2026 — Raising \$14M

What this gives the analyst

Override anything. Weights are editable (House view vs Personal view). Every component links back to the slide it came from. *No hidden model decisions.*

3.16 / 5

Financials
(must-have)

Source • evidence • extractor • run — logged for every value

If anyone asks "why is this company ranked above that one," we can show the receipts.

Live observation table (read-only view)

as_of_date	scenario	period_label	evidence_text	evidence_url	extractor_name	extractor_ver	origin_path

2026-04-30	actual	deck_date	\$4.2M 62 138% \$380K ARR Paying customers	NULL	pitchdeck_v1	1.0	novapay_series_a_deck.pdf
2025-12-31	actual	2025	employee_count 2025 28	NULL	pitchdeck_v1	1.0	novapay_series_a_deck.pdf
NULL	NULL	NULL	Crunchbase: Founded 2022, incorporated in DIFC, Dubai.	NULL	seed_data_v1	1.0	NULL
NULL	NULL	NULL	- no ERP migration required. SERIES A April 2026 (cid:127) Raising	NULL	pitchdeck_v1	1.0	novapay_series_a_deck.pdf
2025-12-31	actual	2025	gross_margin 2025 71%	NULL	pitchdeck_v1	1.0	novapay_series_a_deck.pdf
NULL	NULL	NULL	Founder interview: \$185K MRR as of January 2025, up from \$90K in Jul	NULL	seed_data_v1	1.0	NULL
NULL	NULL	NULL	Founder Ahmed Al-Rashid previously co-founded PayLink (acquired by M	NULL	seed_data_v1	1.0	NULL

For every observation, we log:

- **metric** arr • revenue • burn_rate • ...
- **value + as_of** \$4.2M as of 2026-04
- **scenario** actual • estimate • projection
- **evidence_text** exact snippet from the deck
- **source** source_document + chunk + page
- **extractor** name + version (e.g. pitchdeck_v1)
- **extraction_run** timestamped, replayable
- **confidence** 0.0–1.0, per-observation
- **override** analyst flag + reason, if any

Replayable. Re-running an extractor creates a new run; old observations stay. The resolver picks a winner. Nothing is lost.

Today: inbound decks. Next: every MENA company, ranked.

Same scoring engine — but fed by signals you already trust, before founders ever email you.

TODAY — INBOUND ONLY

Ranking is limited to companies that pitch

Analyst drops a deck → company is detected, observations are extracted with evidence, scores are computed, and it appears in the ranked queue.

- Coverage = whoever sent a deck this week
- Misses companies that never pitch you first
- No early signal on companies trending up

NEXT — OUTBOUND, CONTINUOUS

Rank every MENA company by fit, before they pitch

Filings & registries

DIFC / ADGM / Crunchbase / Pitchbook

News & press

rounds, hires, launches, partnerships

Hiring & growth

headcount deltas, role mix, geo expansion

Web & company sites

product pages, blogs, careers, LinkedIn

Founder signals

prior exits, repeat founders, alumni

Operator interviews

transcribed calls → grounded observations

Same ranking engine. More signals in → sharper ordering of who to call first. The decks that arrive later just confirm what the queue already told you.

Right deal, right call, right time

The prioritised queue compounds: faster reads, sharper focus, more conviction at IC.

VC ANALYST

Spend hours where they matter most

-  **Triage in minutes, not days**
Open the queue → top of list is already the best fit. No more inbox archaeology.
-  **Conviction-ready by the time you call**
Score, evidence, and gaps surface before the first founder meeting.
-  **Defend any rank in IC**
Click any company → visible formula + source-linked evidence. No "trust me" answers.
-  **Override when judgement disagrees**
Personal weights + manual overrides — analyst expertise stays in the loop, with an audit trail.

VC FUND CEO

More qualified deals, reached faster

-  **Sourcing → first contact, accelerated**
Best deals leave the queue first → reach founders before competitors do.
-  **Pipeline you can measure**
Coverage, score distribution, queue throughput — visible, exportable, trended.
-  **Consistent prioritisation across the team**
Every analyst ranks against the same House view; personal views stay overlaid.
-  **LP-ready narrative**
"Here's our top-ranked MENA pipeline, and here's why" — defensible in one click.
-  **AI-sovereign by design**
Data control + traceable extraction → reduced compliance & reputation risk.

★ NORTH STAR ★

**Invest in as many great deals as possible,
more often and faster than the competition.**

Be the go-to fund for startups and LPs.

This prototype is the engine for that mission — grounded, sovereign, and built to scale across MENA.
