

Payment operations, on autopilot.

We cut payment ops costs 42% for mid-market finance teams — no ERP migration required.

SERIES A

April 2026 • Raising \$14M • In discussions with Tier 1 VCs

THE PROBLEM

Mid-market finance teams drown in payment ops.

01

Manual reconciliation

AP and AR teams spend 60% of their time matching invoices, remittances, and bank feeds across disconnected systems.

02

Payment fraud & errors

Mid-market firms lose 1.4% of revenue to payment errors, duplicate payments, and vendor fraud — with no real detection layer.

03

Fragmented stack

ERP handles ledgers. Banks handle rails. Nothing sits in between to orchestrate, validate, and reconcile payments end-to-end.

Result: \$62B wasted annually on payment operations by US mid-market alone.

OUR SOLUTION

A finance co-pilot that never stops reconciling.

NovaPay plugs into your ERP and your banks. Our agents auto-match invoices to payments, flag anomalies before they settle, and close the books in real-time — all in the background, alongside your existing tools.

- **Auto-reconciliation** — 98.3% match rate across 140 banks
- **Agent-driven AP/AR** — Exception handling, not data entry
- **ERP-agnostic** — NetSuite, Sage Intacct, SAP B1, QuickBooks
- **Deploys in 14 days** — No rip-and-replace

Today's reconciliation queue

VENDOR	REF	AMOUNT	STATUS
Acme Corp	Invoice 8821	\$42,150	Matched
Globex Inc	ACH batch 12	\$108,420	Matched
Initech	Wire 3391	\$87,500	Review
Hooli LLC	Invoice 8842	\$23,980	Matched
Pied Piper	Wire 3394	\$215,000	Matched

MARKET SIZE

A \$108B market, stuck in spreadsheets.

Market framing

TAM — \$108B

Global payment ops, reconciliation, and AP/AR automation software spend.

SAM — \$14B

North American mid-market companies (\$50M–\$2B rev) processing 1,000+ payments/month.

SOM — \$2.1B

~18,000 companies in our ICP reachable via direct sales and ERP marketplace listings over 5 years.

Monthly ARR (\$M)

Platform fee + transaction share.

Platform SaaS

\$3K–\$25K / mo

Tiered by monthly payment volume

- Predictable, recurring revenue
- Covers reconciliation, anomaly detection, integrations
- Typical contract: 24 months, annual prepay

Transaction fee

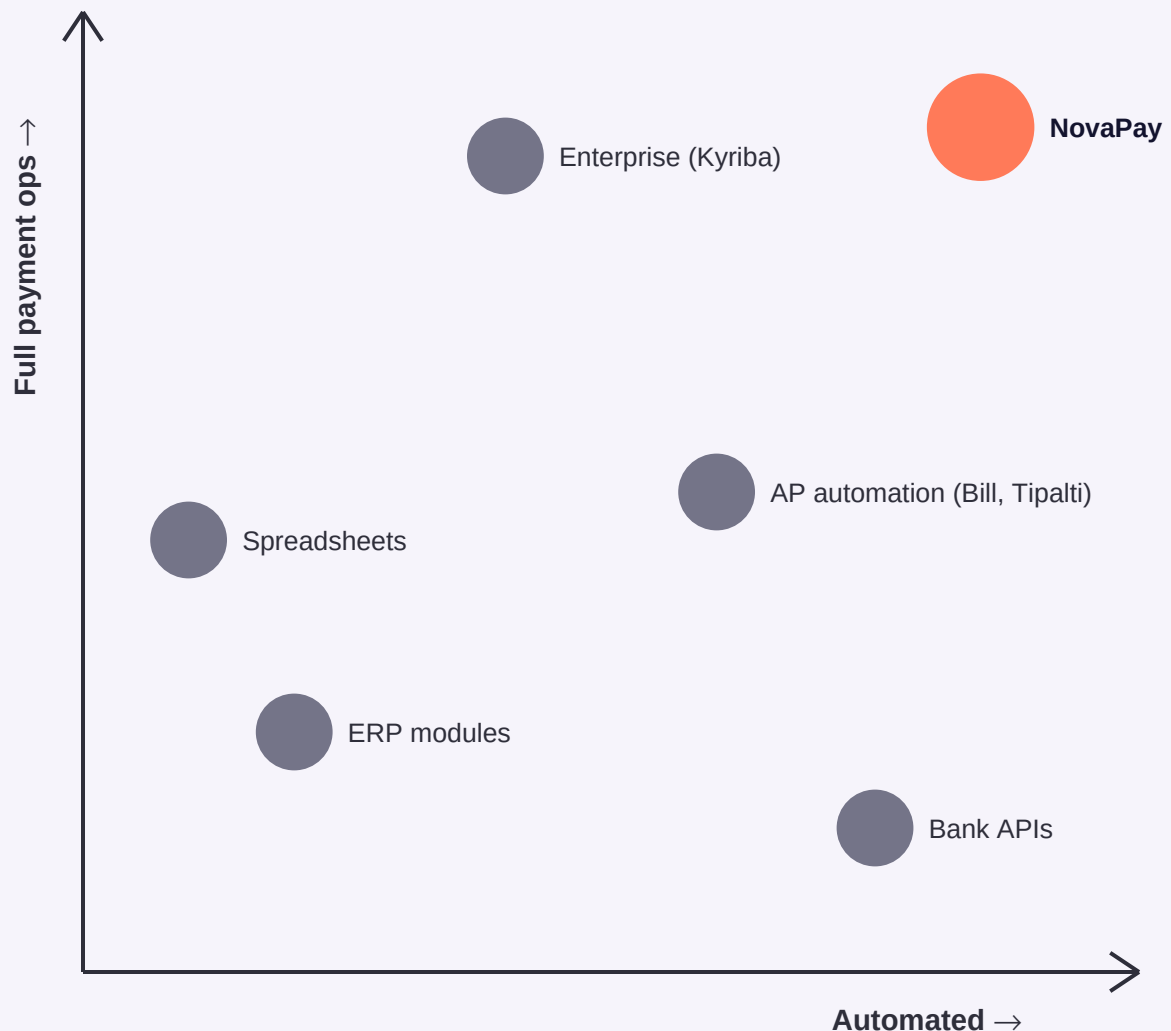

8 bps per payment

On payments routed through NovaPay

- Scales linearly with customer growth
- Drove 38% of 2025 revenue
- Typical customer: 15K payments/mo → ~\$72K/yr

COMPETITION

We sit where no one else does.

Why we win

Data moat

3.4M reconciled transactions growing 12% monthly from customer volume — trains our matching model.

Agent-first UX

Competitors bolt AI onto dashboards. We handle the workflow end-to-end; teams only touch exceptions.

Distribution partnership

Signed reseller deals with NetSuite and Sage Intacct marketplaces in Q1 2026.

Three compounding motions.

Direct sales

Outbound to VP Finance and Controllers at companies with \$50M–\$2B revenue and complex payment ops.

ACV

TEAM

Operators from the inside of fintech.

Priya Raman

CEO & Co-founder

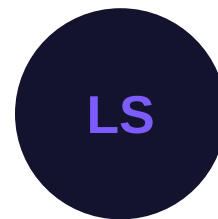

Former VP Finance Ops @ Stripe. Built payment reconciliation at \$1T scale. Stanford GSB.

Marcus Okafor

CTO & Co-founder

Ex-Staff Engineer @ Plaid and Block. Led ML fraud detection handling \$50B/yr.

Lena Schmidt

VP Engineering

Previously Eng Lead @ Adyen. 12 years building core payments infrastructure at scale.

Derek Johnson

Head of Revenue

Built sales org at Ramp from \$2M to \$60M ARR. Deep mid-market CFO relationships.

Advisors include: former CFO @ Shopify, former Head of Product @ Brex, former GM @ Modern Treasury.

Path to \$52M ARR by 2028.

	2024	2025	2026E	2027P	2028P
ARR (\$M)	0.5	2.4	7.8	22.0	52.0
Revenue (\$M)	0.3	1.8	6.2	18.5	44.0
Gross margin	64%	71%	76%	79%	81%
Burn (\$M)	(1.8)	(4.2)	(6.5)	(3.1)	8.5
Customers	9	38	95	210	410
Headcount	12	28	52	95	155

2026E reflects Q1 actuals + contracted pipeline. 2027–2028 projections assume Series A close Q2 2026.

Cash-flow positive: Q3 2027

With current plan + Series A proceeds

THE ASK

Raising \$14M Series A.

Use of funds

45%	Engineering & product
30%	Go-to-market
15%	Data & infrastructure
10%	G&A + runway buffer

MILESTONES THIS CAPITAL UNLOCKS

→ Reach \$22M ARR by end of 2027 → Launch international (UK + DE) → Grow team from 28 to 95 → Close 4 Tier-1 ERP partnerships

Let's rewrite payment operations together.
